 La ghisa una scelta sicura ed ecologica. Un investimento di qualità per il vs. bagno!

Le vasche in ghisa ritornano prepotentemente nei ns. bagni e non è soltanto per la loro bellezza ma perchè in realtà offrono parecchi vantaggi e qualità che non hanno le vasche in acrilico, acciaio o altre materie, che richiedono un investimento un po' piu' importante ma che poi si dimostra intelligente nel tempo :

- **Una scelta ecologica:** la ghisa smaltata è riciclabile contrariamente all'acrilico
- **Una scelta di igiene:** lo smalto delle vasche offre una resistenza senza paragoni alla proliferazione batterica. Questa è la ragione per cui hotels e ospedali da sempre privilegiano la ghisa nella loro scelta.
- **Una scelta di sicurezza:** la ghisa è un materiale non infiammabile che non emette alcun gas o fumo tossico in caso d'incendio
- **Una scelta contro l'inquinamento sonoro:** la ghisa assorbe al massimo i rumori dell'acqua e del bagno rispetto all'acrilico e ferro.
- **Una scelta che dura nel tempo:** contrariamente all'acrilico, le vasche in ghisa sono indeformabili. Una solidità a prova di tutto e che offre caratteristiche inalterabili nel tempo, una durata e resistenza eccezionale al fuoco, agli urti, e ai prodotti chimici.
- **Una scelta di confort:** le caratteristiche naturali della ghisa offrono una capacità termica massima che vi garantisce la temperatura dell'acqua a lunga durata senza aggiungere acqua calda facendo delle economie.
- **Una manutenzione facile:** materiale denso e non poroso per eccellenza, lo smalto non trattiene né calce né altri depositi, facilitando la pulizia. Tutte queste qualità valgono ampiamente il piccolo sovraccosto della ghisa rispetto altri materiali. E poi riportato alla durata di vita del prodotto stesso che può durare fino a 100 anni, il calcolo di convenienza per questo investimento è presto fatto.

 La Fonte : un matériau sécuritaire et écologique. Un investissement de choix pour votre salle de bain !

Les baignoires en fonte émaillée reviennent en force dans nos salles de bain...et ce n'est pas uniquement parce qu'elles sont belles et racées. En effet, elles offrent de nombreuses qualités et avantages que n'ont pas les baignoires en acrylique ou en acier et qui, en dépit d'un investissement un peu plus important, en font un choix malin pour ne pas dire indispensable :

- **Un choix écologique :** la fonte émaillée est recyclable contrairement à l'acrylique
- **Un choix sanitaire :** l'émail des baignoires en fonte offre une résistance sans égal à la prolifération bactérienne. C'est pour cette raison qu'hôtels et hôpitaux doivent privilégier la fonte dans leurs choix d'installations sanitaires.
- **Un choix sécuritaire :** la fonte est un matériau ininflammable n'offrant aucun dégagement de gaz ou de fumées toxiques en cas d'incendie
- **Un choix contre la pollution sonore :** la fonte émaillée absorbe un maximum des bruits d'eau et du bain contrairement aux baignoires acryliques ou en acier.
- **Un choix ancré dans le temps :** contrairement à celles en acrylique, les baignoires en fonte sont parfaitement indéformables. D'une solidité à toute épreuve, elles offrent des caractéristiques d'inaltérabilité, de durabilité et une résistance exceptionnelle au feu, aux chocs et aux produits chimiques.
- **Un choix de confort :** les caractéristiques naturelles de la fonte offrent une capacité thermique maximale vous garantissant un bain à bonne température longtemps sans rajout d'eau chaude et aussi par là même de substantielles économies.
- **Un choix d'entretien facile:** matériau dense et non poreux par excellence, l'émail n'accroche ni le calcaire ni d'autres dépôts ce qui facilite grandement son entretien. Toutes ces qualités valent largement le petit surcoût supplémentaire lors de l'acquisition d'une baignoire en fonte comparé à une baignoire en acrylique. Et puis, ramené à la durée de vie d'un tel produit qui peut aller jusqu'à plus de 100 ans, le calcul de rentabilité de son investissement est vite fait.

 Enameled cast iron : a safe and ecological material . A smart choice for your bathroom!

Enameled cast iron bathtubs are back for good in our bathrooms ... and this is not only because they are beautiful. Indeed, they offer many features and benefits that do not have the acrylic or steel bathtubs. And despite a slightly larger investment , they do represent a smart if not essential choice for many reasons:

- **An ecological choice:** cast iron is recyclable unlike acrylic. Therefore it does protect our planet!
- **A health choice :** enamel cast iron bathtubs offer unmatched resistance to bacterial proliferation. . It is this essential characteristic that leads hospitals and Palace hotels to favor cast iron bath tubs in their Bathrooms.
- **A safe choice :** the cast is a non flammable material. It does not release gas or toxic fumes in case of fire unlike acrylic
- **An anti noise pollution choice :** Cast iron ideally absorbs all noise of water and bath unlike steel or acrylic. It offers you a quiet bath everyday
- **A long term investment choice :** A rock solid, enameled cast iron offers exceptional features of inalterability, durability and exceptional resistance to fire, impacts and chemicals. They are also perfectly non-deformable unlike those in acrylic
- **A comfort choice:** The natural characteristics of the cast offer maximum thermal capacity.

You keep the assurance of a good bath temperature without addition of hot water or losing the heat too fast like with acrylic tubs.

- **A maintenance easy choice :** The enamel is a dense, non-porous material which does get limestone or other potential deposits. Maintenance and cleaning is therefore very easy. All these qualities are well worth the extra cost when buying a cast iron bathtub compared to acrylic or steel bathtub . And your return on investment is even more obvious when you consider that such product has a life cycle of more than 100 years!
